

## *The Star Festival*

This is the Milky Way.

On this side, there lived a girl

Her name is Vega.

On the other side, there lived a boy.

His name is Altair.

Vega's job was making clothes.

She was working hard.

Altair's job was taking care of cows.

He was working hard, too.

This is the God.

The God was happy (, because they worked hard).

The God made Vega and Altair married.

Vega and Altair became a good couple.

Vega and Altair played every day, but Vega and Altair didn't work.

Vega didn't work.

So, the God's clothes got old.

Altair didn't work.

So, cows got sick.

The God got angry.

The God made Vega and Altair live separately.

Vega and Altair were so sad.

God said, "Work hard, and you can stay together once a year."

Since then, Vega and Altair have been working hard.

And on July 7<sup>th</sup>, Vega and Altair can cross the Milky Way.
